Figure S1. **Epithelial IKK α protects from DSS-induced colitis.** (A and B) Representative H&E staining of colon Swiss rolls from *Ikka*^{WT/WT} and *Ikka*^{AA/AA} (A) and *Ikka*^{F/F} and *Ikka*^{ΔIEC} (B) mice treated with DSS for 5 d and analyzed on day 9. Bars, 2 mm. The histograms show the quantification of total ulcer length. Data represent mean \pm SEM. $n = 8$ for *Ikka*^{WT/WT} and *Ikka*^{AA/AA}. $n = 5$ for *Ikka*^{F/F} and *Ikka*^{ΔIEC}. *, $P < 0.05$; ***, $P < 0.001$ by Student's t test.
