Suppl. Figure 2

Establishment of UKF-NB-4HiGCV cells. UKF-NB-4Hi cells were treated for 6 passages with ganciclovir 20µM (GCV). A) HCMV virus titres in GCV-treated UKF-NB-4Hi cells at different passages in comparison to non-treated UKF-NB-4Hi cells. * P < 0.05 relative to non-treated UKF-NB-4Hi cells B) HCMV virus titres in GCV-cured UKF-NB-4Hi (UKF-NB-4HiGCV) cells after cultivation for 10 passages in the absence of GCV in comparison to non-treated UKF-NB-4Hi cells. n.d. = not detectable C) HCMV DNA copy numbers as indicated by quantitative PCR in GCV-treated UKF-NB-4Hi cells at different passages in comparison to non-treated UKF-NB-4Hi cells. * P < 0.05 relative to non-treated UKF-NB-4Hi cells D) HCMV DNA copy numbers in UKF-NB-4HiGCV cells after cultivation for 10 passages in the absence of GCV in comparison to non-treated UKF-NB-4Hi cells. n.d. = not detectable
