Briefe von Jeanette Wohl an Ludwig Börne

Nachl.L.Börne BIX, Nr. \_\_\_\_\_, Bl. \_\_\_\_\_

The first part of the paper is devoted to a general  
 consideration of the subject, and to a statement of the  
 objects which it has in view. It is then divided into  
 three parts, the first of which is devoted to a  
 description of the nature and extent of the  
 disease, the second to a statement of the  
 causes which give rise to it, and the third to  
 a description of the symptoms which it  
 produces. The first part is the most  
 important, and the most difficult to write,  
 as it is necessary to state the facts  
 as they are, without any attempt to  
 explain them, or to draw any conclusions  
 from them. The second part is the next  
 in importance, and the third is the least  
 important, as it is only necessary to  
 state the symptoms which are  
 produced by the disease, and to  
 describe the manner in which they  
 are manifested.
