

Supplementary Figure 1. ACLY overexpression does not affect IL-4-induced gene expression in MDMs. (A) ACLY protein expression in GFP and ACLY-overexpressing MDMs. **(B)** IL-4 - induced mRNA expression of ALOX15, F13A1 and CCL17 in GFP and ACLY-overexpressing MDMs. *, $p < 0.05$, vs. GFP. Data represent mean values \pm SE of 3 independent experiments.
