LOCKSS (Lots of Copies Keep Stuff Safe)

Vortrag am 6th Frankfurt Scientific Symposium, GNARP und wie sie die Welt sieht: Aussichten transatlantischer Partnerschaft im digitalen Zeitalter: 5.10.2006 - 7.10.2006

The LOCKSS (Lots of Copies Keep Stuff Safe) Alliance is an international community of about 100 libraries and partners like OCLC. For almost a decade the LOCKSS open source model has been tested for its robustness against attack and for its ability to migrate formats. LOCKSS »boxes« at 150 institutions in more than 20 countries comprise a peer-to-peer system that automatically cross-checks content to ensure the accuracy and completeness of all member archives. Eighty publishers, including large publishers like Oxford University Press, are now participating in LOCKSS or actively preparing to add their journals to the program.
