Supplementary file 8. Comparison of mitochondrial and nuclear divergence time estimates. **A.** Chronogram inferred from the mtDNA-91T dataset using BEAST v.1.8.4 (Drummond *et al.* 2012). Divergence time estimates are reported for the nodes supported by PP ≥ 0.95 (black circles). **B.** Chronogram inferred from the nuDNA-78T dataset using BEAST v.1.8.4 (Drummond *et al.* 2012). Divergence time estimates are reported for the nodes found in concord-ance with the mtDNA chronogram and nodes discussed in the text. In both chronograms 95 % confidence intervals are indicated by horizontal grey bars.
