Nandintsetseg Dejid, Kirk Olson, Theresa S. M. Stratmann, and Thomas Mueller. A gazelle's extraordinary, 18,000-km-long journey through the steppes of Mongolia. *Ecology*.

### **Video S1: An extraordinary, five-year journey of a Mongolian gazelle**

This video shows the five-year movement track of a female Mongolia gazelle that completed a nomadic journey of more than 18,000 km and ventured into presumably unfamiliar terrain several times. This multiyear journey highlights the importance of highly permeable landscapes, which allow nomadic ungulates to locate dynamic resources and escape areas affected by extreme events in an unpredictable environment. Video by Theresa Stratmann & Nandintsetseg Dejid.
