

Minimally-edited transcripts

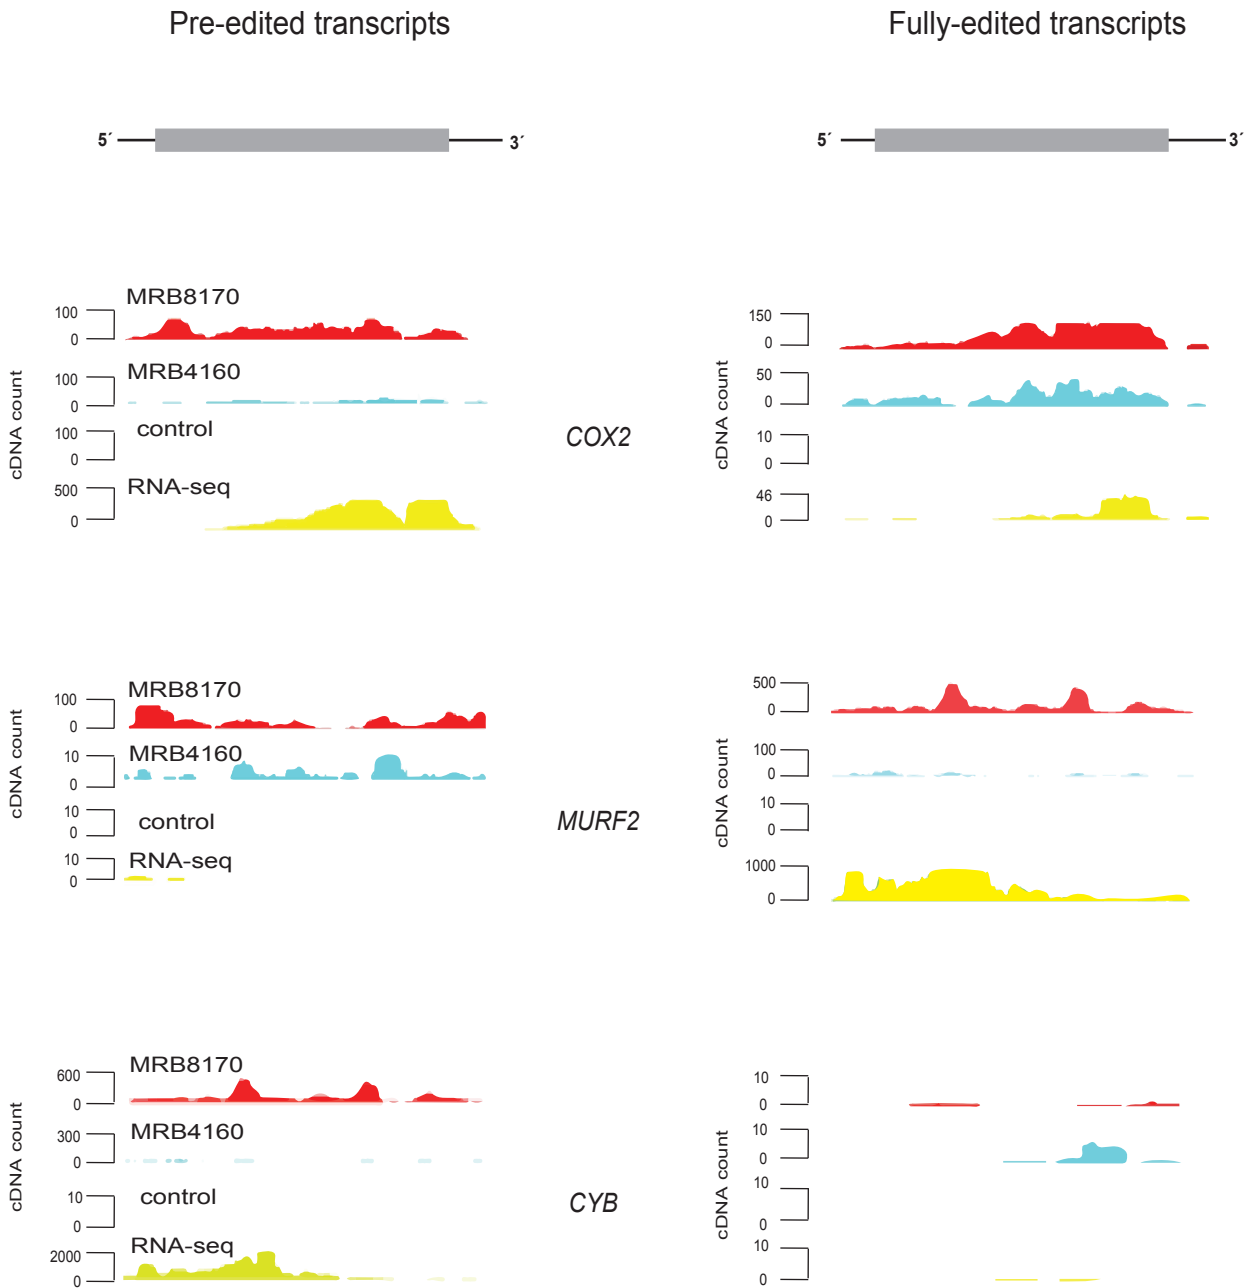

Figure S5. MRB8170 and MRB4160 binding to minimally-edited transcripts

Genomic browser snapshot of mapped iCLAP-tags and RNA-seq reads to *COX2*, *MURF2* and *CYB* transcripts. Labeled as in Figure S3. The genome browser snapshots depicted the binding of proteins over the entire pre-edited *COX2*, *MURF2* and *CYB* transcripts.

Figure S5.
