

## Suppl. Figure 6

**Suppl. Figure 6.** Quantitative, fluorescence-based Western blot analysis of the survivin and γH2AX levels in UKF-NB-3 cells, UKF-NB-3 cells transduced with a lentiviral vector encoding p53 shRNA (UKF-NB-3<sup>p53shRNA</sup>), or UKF-NB-3 cells transduced with a lentiviral vector encoding non-targeting ('scrambled') shRNA (UKF-NB-3<sup>scrshRNA</sup>) 24h post irradiation.
