Supplementary Figure 1:

(a) Kaplan-Meier survival curve of K14-IL-17A^{ind/+} and control mice with and without telmisartan treatment, n = 7-10 mice per group, Mantel-Cox test. (b) Cytokine profile in plasma of K14-IL-17A^{ind/+} mice. Data was generated using the Bio-Plex assay kit in plasma of mice. IL-17A^{ind/+} control mice were normalized to 100% (indicated with the dashed line), percentual change compared to control is shown for K14-IL-17A^{ind/+} mice, n = 3-6, either Student's unpaired t-test or Mann-Whitney t-test. Data are presented as mean \pm SEM.
