

Supplemental Material

The systematic uncertainties in the model dependent and independent approaches are summarized in the following Table II.

TABLE II. Impact of the systematic uncertainties on the model-dependent fits and on the model-independent fit. All the values for the model-dependent fits are the absolute differences, while those for the independent fit are the relative differences in %.

| Systematic sources | $\rho^0\text{-}\omega\text{-}\rho'$ | | | | | | $\rho^0\text{-}\omega\text{-box anomaly}$ | | | | | | model-independent fit | | |
|------------------------|-------------------------------------|---------------|------------|--------------|-----------|---------------------------|---|------------|----------|----------|-----------|-------|-----------------------|------|--|
| | $M(\rho^0)\Gamma(\rho^0)$ | $\arg \delta$ | $ \delta $ | $\arg \beta$ | $ \beta $ | $M(\rho^0)\Gamma(\rho^0)$ | $\arg \delta$ | $ \delta $ | α | κ | λ | ξ | | | |
| 4C kinematic fit | 0.20 | 0.37 | 0.52 | 0.09 | 0.19 | 0.96 | 0.22 | 0.38 | 0.75 | 0.10 | 0.05 | 1.82 | 3.62 | 3.89 | |
| MDC tracking | 0.04 | 0.08 | 0.21 | 0.00 | 0.23 | 1.20 | 0.05 | 0.12 | 0.17 | 0.00 | 0.06 | 0.10 | 0.85 | 0.44 | |
