

**S3 Table. Specific scoring parameters for simulated retinal detachment**

**surgery.** Target parameters are indicated by a positive, faults by a negative point range. The primary targets are marked with a star (\*).

Scoring parameter	Point range
Reattached retinal area*	+50
Removed tractive tissue*	+20
Stabilization of retinal tears (by endolaser)	+30
Remaining PFC in the eye	-100
Instrument near macula	-20
Misplaced laser patch	-100
Fovea hit by laser	-100
Optic disc hit by laser	-100
Vessel hit by laser	-20
High laser energy on retina	-10
Retinal injury due to laser energy	-100
